Career Objectives:

To be able to work for an encouraging and stable company that will assist me in developing, improving and obtaining the necessary skills to become the best.

Relevant Experience:

Freelance Software Engineer

Jan 2013 - Present

After completing High school, I taught myself how to build software. Since then I have been building things that live on the internet. I have been doing freelance gigs building small to large projects in diverse fields. During this journey I got the skills to be a full stack web developer. Till today I do these gigs to learn more and advance my skills.

Software Engineer, Founder @ The Sign Factory

Jan 2018 - Present

I started my own business similar to Topaz Digital Solutions where we build IoT devices and Embedded Systems

- ▷ I develop software for IoT micro controllers.
- ▷ I develop web based backend for IoT devices to collect or transmit data.
- ▷ I do graphic designs for flyers and posters and also design UI/UX for apps & web apps.

Junior Developer @ Topaz Digital Solutions

Jan 2016 - Dec 2017

Topaz Digital Solutions is an embedded systems manufacturing company. Here I was introduced to the world of IoT and Electronics design.

- ▷ I did motherboard components assembly.
- ▷ I developed web based backend for IoT devices to collect or transmit data.
- ▷ I did graphic designs for flyers and posters and also design UI/UX for apps & web apps.

C.T.O, Co-Founder @ Geekmergency Limited

Jan 2014 - April 2016

My First Tech Startup. We were providing software solutions in diverse fields. We also started a network based streaming service.

- ▷ I built the streaming service web app, both front and back end.
- ▷ I built the linux servers for the streaming service.
- ▷ I helped build the network servers and security for the streaming service 2.4Ghz network.
- ▷ I built an e-shop for a medical supplier start-up.
- ▷ I built the company website.

Current Projects:

- ▷ Ifixphones - A Laravel based website
<http://ifixphones.co.ke>
- ▷ Loudio - An audio streaming platform in python
<https://github.com/KimaniKabiria/loudio>
- ▷ Booring Tech (Laracraft) - A Laravel based CMS for building my clients sites.
<https://github.com/KimaniKabiria/booringtech>
- ▷ Corazon Energy - A Website for a client in energy field
<http://corazonenergy.co.ke>
- ▷ The WiCH - A wireless controlled electrical switch
<https://github.com/KimaniKabiria/The-WiCH-V1>

more projects are at my github page

More About Me:

👤 Gender: Male

📅 D.O.B: 07 - Oct - 1993

🌐 <https://www.linkedin.com/in/kimanikabiria/>

Technical Skills:

Programming Languages:

Python, Php, HTML, CSS/Sass, SQL
C++, Kotlin, Java

Libraries & Frameworks:

Django, Laravel, React, Vue
